FOIA Request No. EPA-R2-2017-000600

Enclosed is a printout for a RCRA Handler file called Goldstein Martin, 61 Main Street, Port Washington, New York, and EPA ID No. NYD981075013. The EPA file for Goldstein Martin was destroyed on or about September 2009. The file was destroyed due to EPA regulations regarding the records disposition retention schedules.

Report run on: October 13, 2017 - 12:52 PM

Report Description

The RCRA Site Detail report provides "all available details" from the handler module and summarized information from the waste activity monitoring module for one RCRA site. The report integrates National Biennial RCRA Hazardous Waste Report data with Site Identification data.

Details reported about the RCRA site include basic handler module information; the standard suite of universes; information about each source record received for the facility, including basic information, location and mailing address, source record and permit contact person (including historical records), list of NAICS codes, complete list of regulated waste activities; and summarized National Biennial RCRA Hazardous Waste Report information by reporting cycle year, including quantity totals (generated, managed, shipped, received), and top ten GM forms by quantity generated. Top ten GM form list shows reported waste description, quantities, onsite and offsite system types, and EPA and State waste codes.

Information listed for the RCRA site can be limited by latest historical information and most recent BR cycle.

Data is sorted by the most recent Received Date. If more than one record has the same Received Date, the data is sorted by Source Type (I-Implementer, N-Notification, B-Biennial Report with Subsequent Notification, R-Biennial Report, A-Part A. T-Temporary, E-Emergency).

List of Hazardous Waste Code Descriptions

Please run the lookup table report for LU_WASTE_CODES for description of federal and state waste codes in this report.

List of Handler Universe Abbreviations

Active Status -- Indicates that the facility could be subjet to the federal RCRA, Subtitle C or a state's authorized Active hazardous waste program. This definition has no legally enforceable or binding determination about the status of a particular site or the oblications of an owner or operator.

Commercial TSDF -- Indicates that the facility is a commercial operator of treating, storing and disposing of Commercial TSDF hazardous waste.

Environmental Indicator (Human Exposure/Groundwater Release) -- Indicates that the facility has controls in El Indicator (HE/GW) place for Environmental Indicators. HE - Human Exposures ('+' indicates the exposure exists and is under control;

' indicates the exposure exists and is not under control; 'N' indicates the exposure does not exist). GW -Groundwater Release ('+' indicates the exposure exists and is under control; '-' indicates the exposure exists and is not under control; 'N' indicates the exposure does not exist).

Federal Generator Status -- Indicates the regulatory status of the site as determined by the quantity and/or toxicity Federal Generator

of hazardous wastes generated, stored or accumulated over a specified period of time.

HSM -- 1st character - Indicates that the facility manages hazardous secondary material(s) (e.g. spent material, **HSM** by-product or sludge) that when discarded, would be identified as hazardous waste. 2nd character - Indicates that the product of the facility's recycling process has levels of hazardous constituents that are not comparable to or

unable to be compared to a legitimiate product or intermediate but the recycling is still legitimate.

Institutional Controls in Place - Indicates that the facility has Institutional Controls in place ('Y' indicates that the IC In Place

facility is in the universe).

Importer -- Indicates that the facility imports hazardous waste into the United States from a foreign country. Importer

Mixed Waste Generator -- Indicates that the facility is a generator or TSDF that handles waste mixed with nuclear Mixed Waste Generator

source, special nuclear or by-product material.

Operating TSDF -- Indicates that the facility is a Treatment, Storage or Disposal facility subject to any type of Operating TSDF

enforcement. It then specifies the type of facility (L - Land Disposal; I - Incinerator; B - BIF; S - Storage; T -

Treatment).

Short Term Generator -- Indicates that the facility is a short term or one time event generator and not generating Short Term Generator

from ongoing processes.

State Generator Status -- Indicates the regulatory status of the site in view of implementing the State's "broader in State Generator

scope" or "more stringent than" rules. Although an implementing State might use terms that differ for their

generators these terms would be translated to match the Federal regulatory term.

Transporter -- Indicates that the facility is engaged in the off-site transportation of hazardous waste. ('Y' indicates Transporter

that the facility is in this universe).

Subpart K/College or University -- Indicates facility has opted into the subpart k laboratory rule as a college or Subpart K/College

university

Subpart K/Teaching Hospital -- Indicates facility has opted into the subpart k laboratory rule as a teaching Subpart K/Hospital

hospital.

Subpart K/Non-profit Research Institute -- Indicates facility has opted into the subpart k laboratory rule as a non-Subpart K/Non-profit

profit research institute.

Subpart K/Withdrawal from Rule -- Indicates facility has withdrawn from the subpart k laboratory rule. Subpart K/Withdrawal
